## SINGLE SHAFT GRINDERS

SMART SOLUTIONS TO PRESERVE THE ENVIRONMENT

VERSATILE AND COMPACT

The AE grinder is a compact and durable machine for grinding electronic boards, electrical cables and plastics. The machine achieves precise granulation and prepares the material for further processing. The AE1200 grinder also proves to be reliable in the processing of wood and paper. Large single-rotor technology finds application in the simplicity of a small machine designed to be able to achieve a calibrated output thanks to the screen that defines the size of the output product.
