TQ

FOUR SHAFTS SHREDDERS

SMART SOLUTIONS TO PRESERVE THE ENVIRONMENT

POWER AND PRECISION

Using four-shaft shredders increases operational possibilities in solid waste treatment. TQ shredders combine, in fact, the reliability and strength of twin-shaft shredders with the possibility of controlling the size of the output material. Built for even very intensive uses, the TQ shredders are the result of a state-of-the-art design aimed at creating efficient and flexible machines. The unique system of interchangeable shafts and the use of screens with anti-wear treatments has led to a drastic reduction in operating costs and maintenance work.
