— SERIES

XH

SINGLE SHAFT SHREDDERS

SUPERIOR PERFORMANCE AND HIGH VOLUMES

Single-rotor shredders of the XH series meet high working standards and ensure high productivity in the processing of various metals, aluminum, cables, pulper. Enhanced in structure and performance, XH series shredders combine the traditional grinding method with a technology based on interchangeable blades equipped with a special buffer bearing that protects against breakage. Everything in the construction of these grinders is designed to ensure maximum reliability, fast maintenance, and to achieve a significant increase in productivity.
