SINGLE SHAFT SHREDDERS

SMART SOLUTIONS TO PRESERVE THE ENVIRONMENT

POWER AND PRECISION

XM series single-shaft shredders meet high working standards and ensure high productivity especially in the processing of plastics, municipal solid waste, wood, rubber, paper and cardboard. Enhanced in structure and performance, XM series grinders combine the traditional grinding method with a technology based on interchangeable blades equipped with a special buffer bearing that protects against breakage. Everything in the construction of these shredders is designed to ensure maximum reliability, fast maintenance and to achieve a significant increase in productivity. The machine is equipped with an exclusive safety control that prevents damage and stops it immediately if nonconforming material is accidentally introduced.
